

SARANGSoft

Installation Guide of filexpertez

Version 2.5

(November 2015)

Description

filexpertez is a powerful yet simple to use file management tool for desktop and server computers that helps locate multiple file types to be replicated, deleted, backed up and restored using a simple UI. The backup and restore feature of filexpertez matches or beats most of the existing products with such functionality. This version includes uploading the backed up files to cloud locations like Amazon S3 or Windows Azure.

The highlights of filexpertez are:

- Versatile and powerful backup and restore functionality
- Direct upload of backed up files to remote locations such as FTP Server, Amazon S3 or Windows Azure
- Managing files using CloudScape Explorer
- Filtering and Scheduling facility available while taking backup
- Restoring files based on your choices using 'Filter' option
- Restoring various versions of backed up files
- Cleanup of unwanted files based on your choices
- Replication of a file tree based on multiple parameters
- Increased security using military grade encryption with 128/192/256 bit AES
- Intuitive UI for all your choices and needs

System Requirements

Minimum System Requirements

- Windows XP-SP3
- .NET Framework 4
- 30 MB of free hard disk space
- 512 MB RAM
- Pentium III processor

Recommended System Requirements

- Windows XP-SP3 and above
- .NET Framework 4
- 50 MB of free hard disk space
- 1 GB RAM
- Pentium IV processor and above

Compatibility

filexpertez version 2.5 supports Windows XP, Windows Vista, Windows 7, Windows 8, Windows 8.1, Windows 10, Windows Server 2003, Windows Server 2008 and Windows Server 2012.

Installation

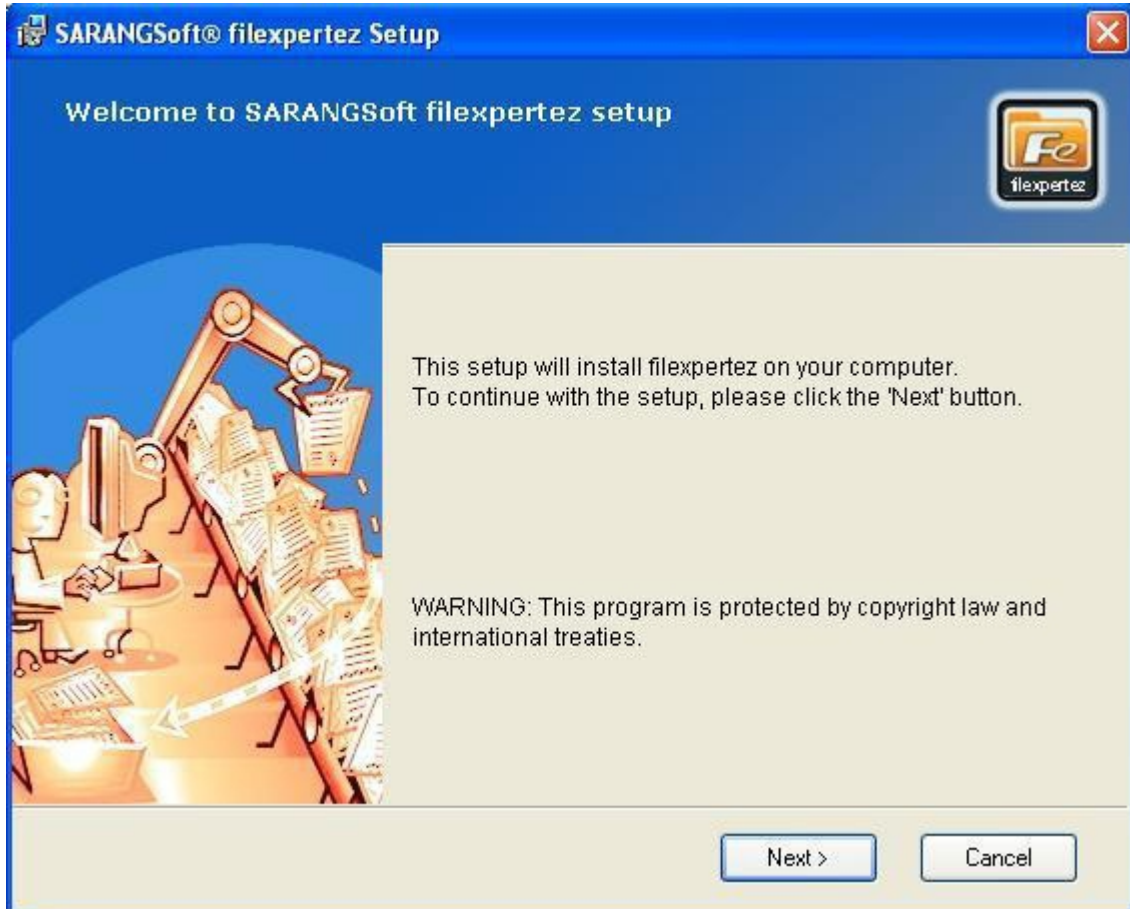

The installation of filexpertez will automatically start as soon as the product CD is inserted in the CD-ROM or DVD-ROM drive of the computer. If installation does not start automatically, please double-click on 'autorun.exe' to manually start the installation.

Before installation of filexpertez on a PC, it is recommended to ensure the following:

- The PC meets the Minimum System Requirements, and preferably the Recommended System Requirements.

Steps for Installation

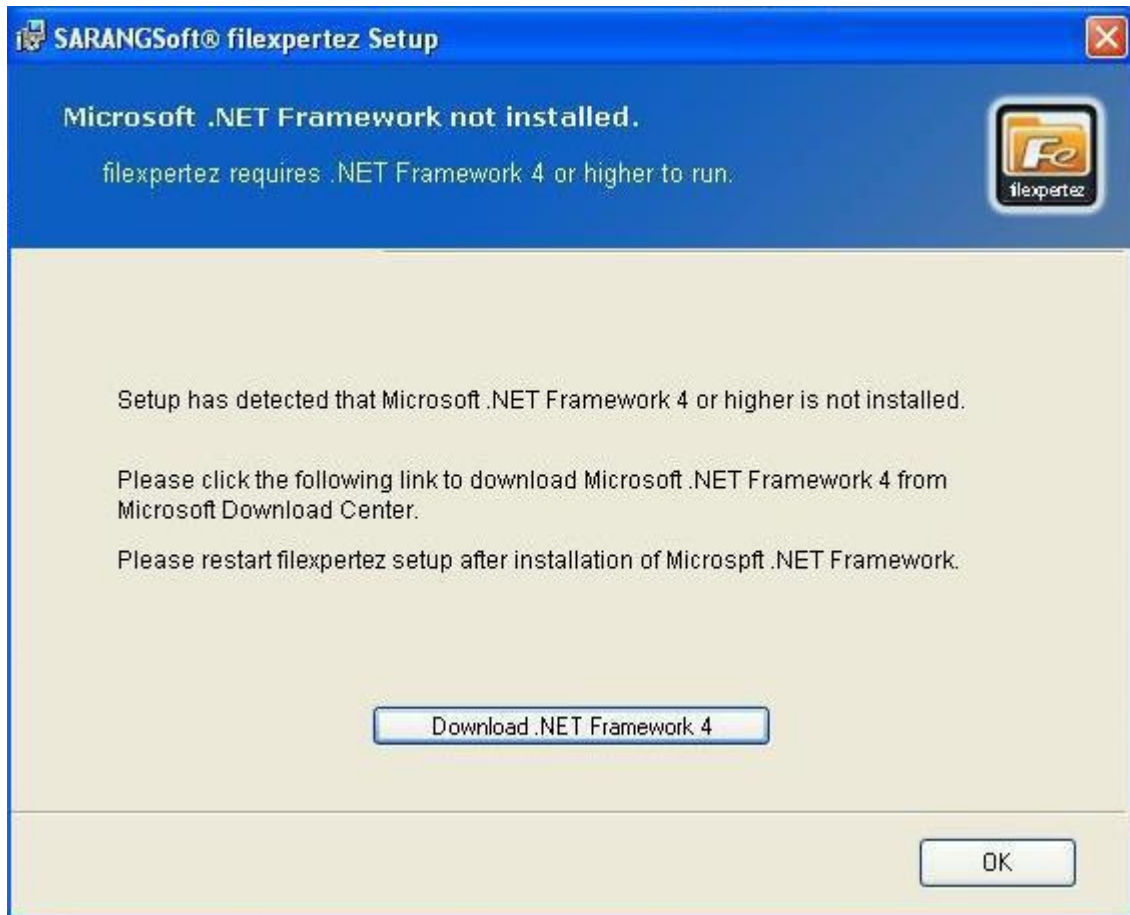

Step 1: Figure-1 shows the first dialog that appears when you start installation.

(Figure - 1)

Click on 'Next' button to continue the installation process.

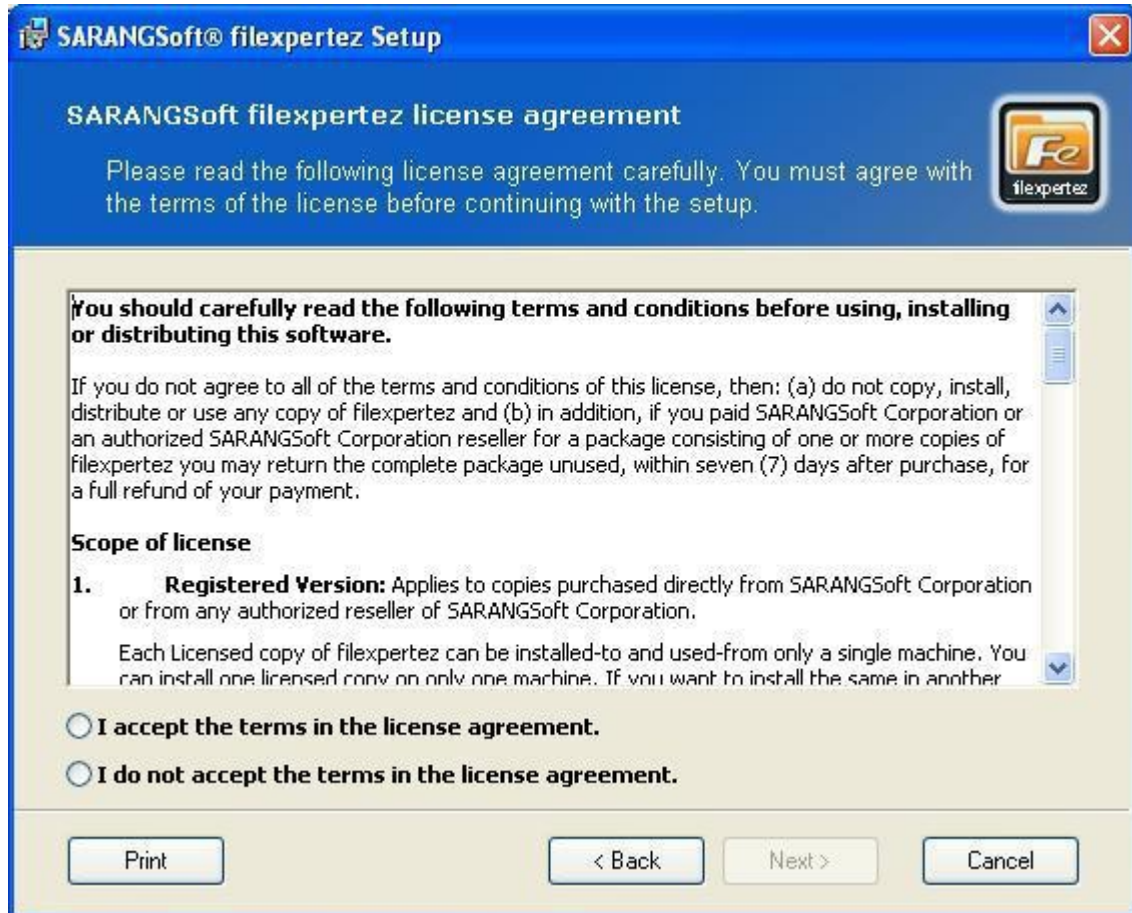

Step 2: If your computer does not have .NET Framework 4.0 installed, you get the dialog as shown in Figure-2 that asks you to download .NET Framework 4.0 from the given link (Microsoft Download Center). Click on the download button to download and install .NET Framework 4.0.

(Figure - 2)

Once .NET Framework 4.0 is downloaded and installed, you have to repeat Step 1 to install filexpertez.

Step 3: Click on "I accept the terms in the license agreement". As soon as you do so the 'Next' button gets enabled. Refer Figure-3.

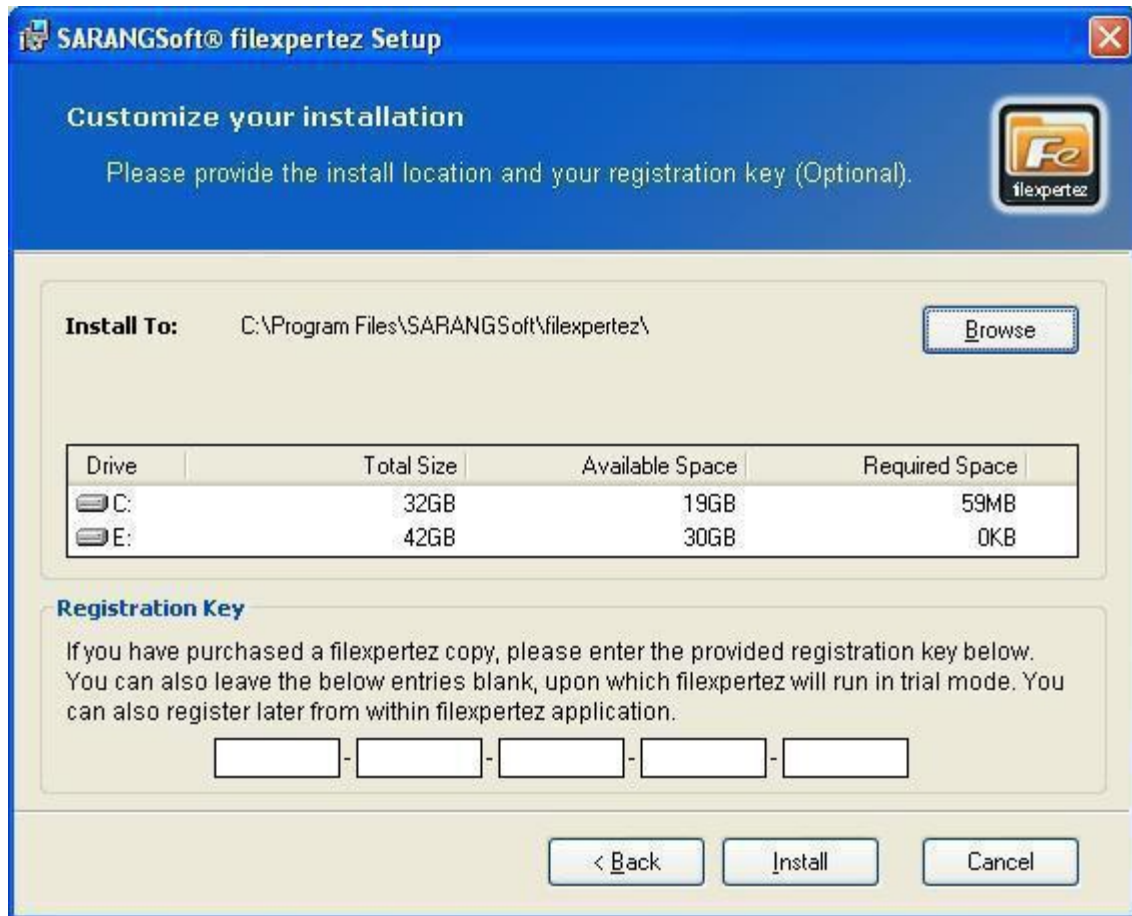

(Figure - 3)

Click on the 'Next' button to continue.

Step 4: This dialog (Figure-4) allows you to choose an installation location. By default it is installed in the location <System Drive>\Program Files\SARANGSoft\filexpertez\. You can change the location by clicking on Browse button.

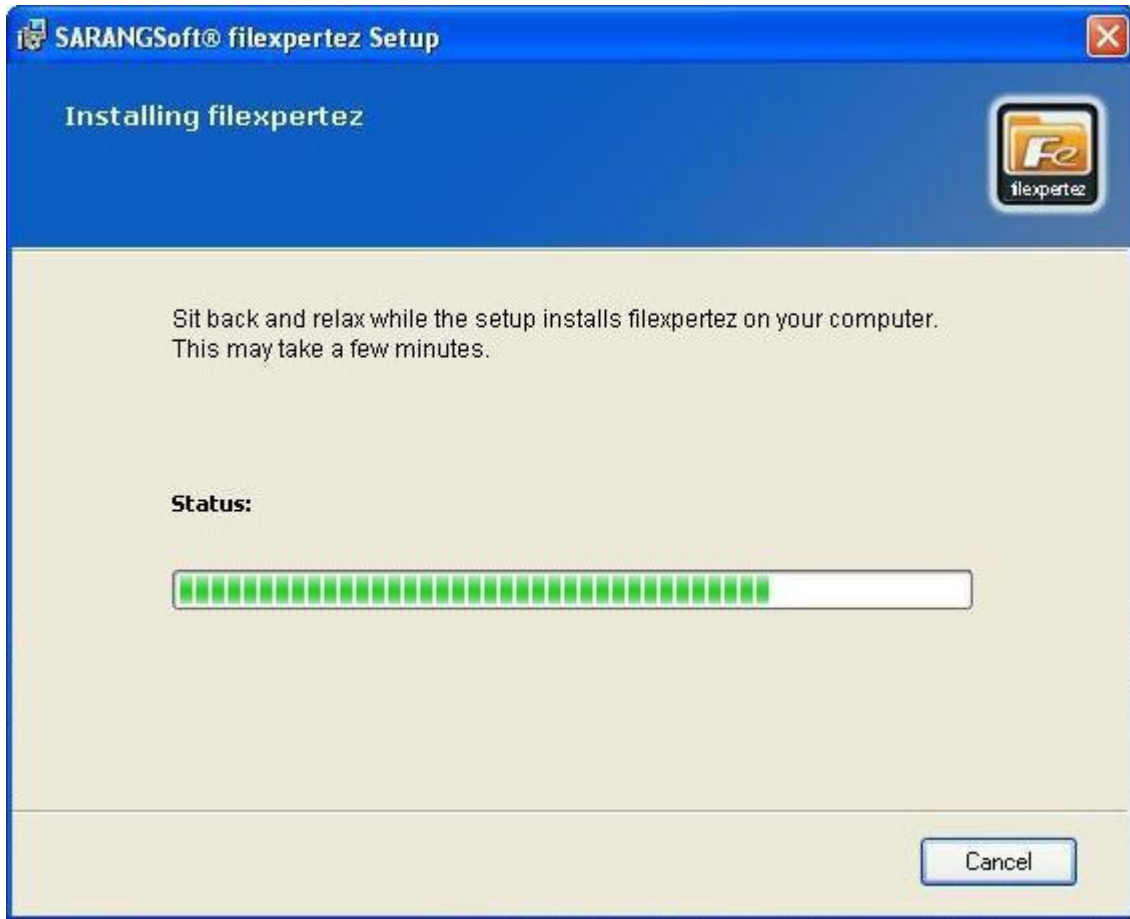

Enter the Registration Key if you have purchased filexpertez copy. You may leave it blank, upon which filexpertez will run in trial mode. You may register later from within the application.

(Figure – 4)

Click on the 'Install' button to continue.

Step 5: The below dialog (Figure-5) shows the installation progress. It takes a few minutes for the installation.

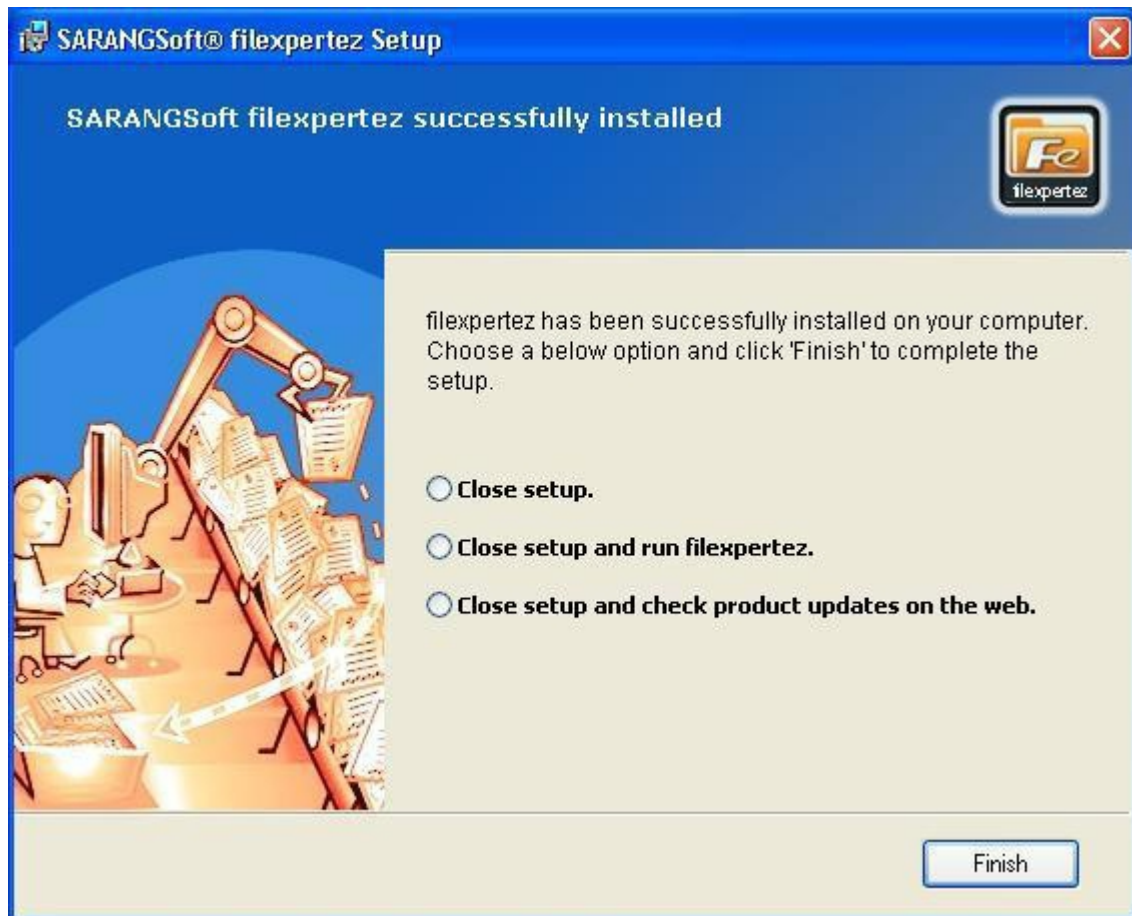

(Figure – 5)

Step 6: Once filexpertez is installed, you will see the dialog as shown in Figure-6.

The dialog appears with three different options to finish the setup. Choose any one of these as you require. The options are:

1. *Close setup:* Finishes the setup only. You can run filexpertez from Windows Start menu, later.
2. *Close setup and run filexpertez:* Not only finishes the setup, but makes the application run also.
3. *Close setup and check product updates on the web:* Finishes the setup and runs an auto-updater application which checks for any new updates on the web. If available, filexpertez is updated to that version, upon user's approval.

Click on 'Finish' button to complete the installation process.

(Figure – 6)

The above installation description will allow you to easily install filexpertez v2.5 on your Windows PC. You may find some more messages while installation is in progress, for example:

1. The below dialog (Figure-7) is shown if you have already installed a newer version of SARANGSoft filexpertez. Older version of filexpertez cannot be installed if a newer version is already present in the computer.

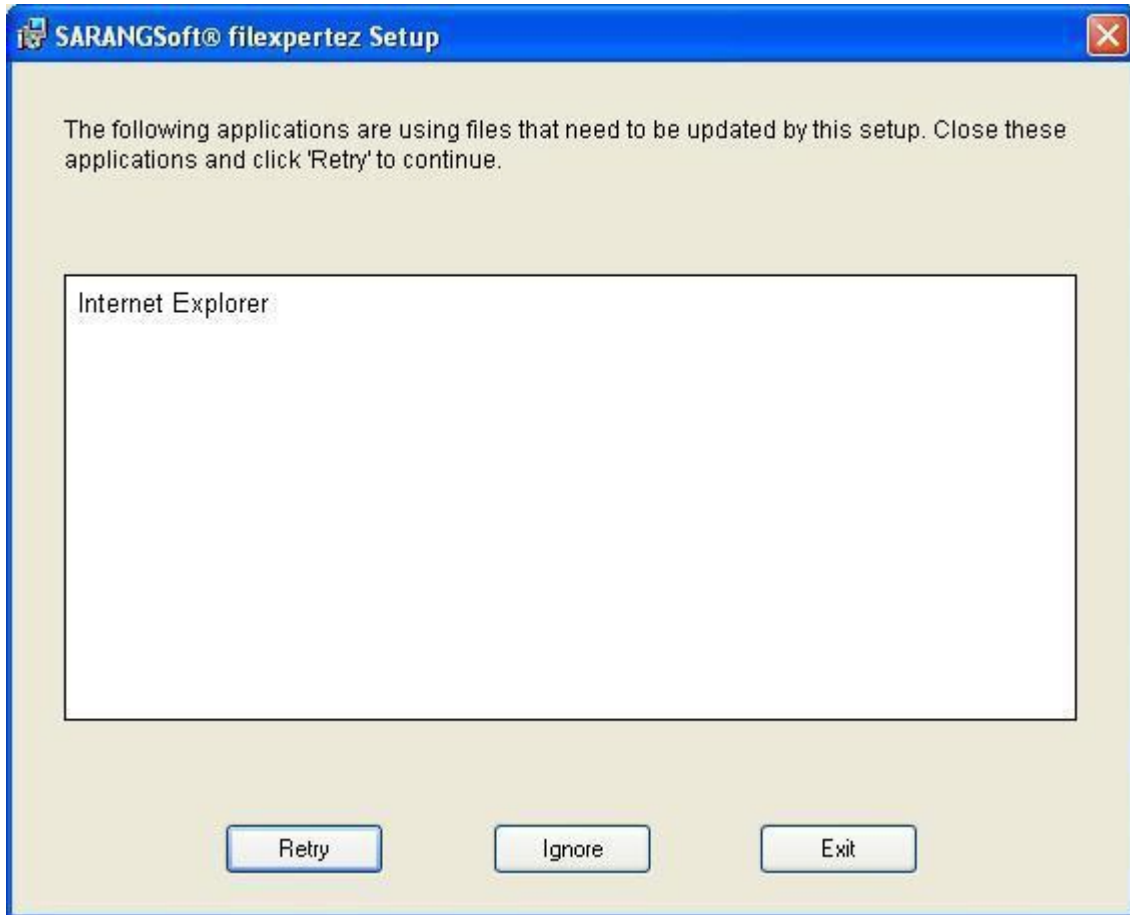

(Figure - 7)

2. The below dialog (Figure-8) is shown if the Setup process is canceled by the user before completion.

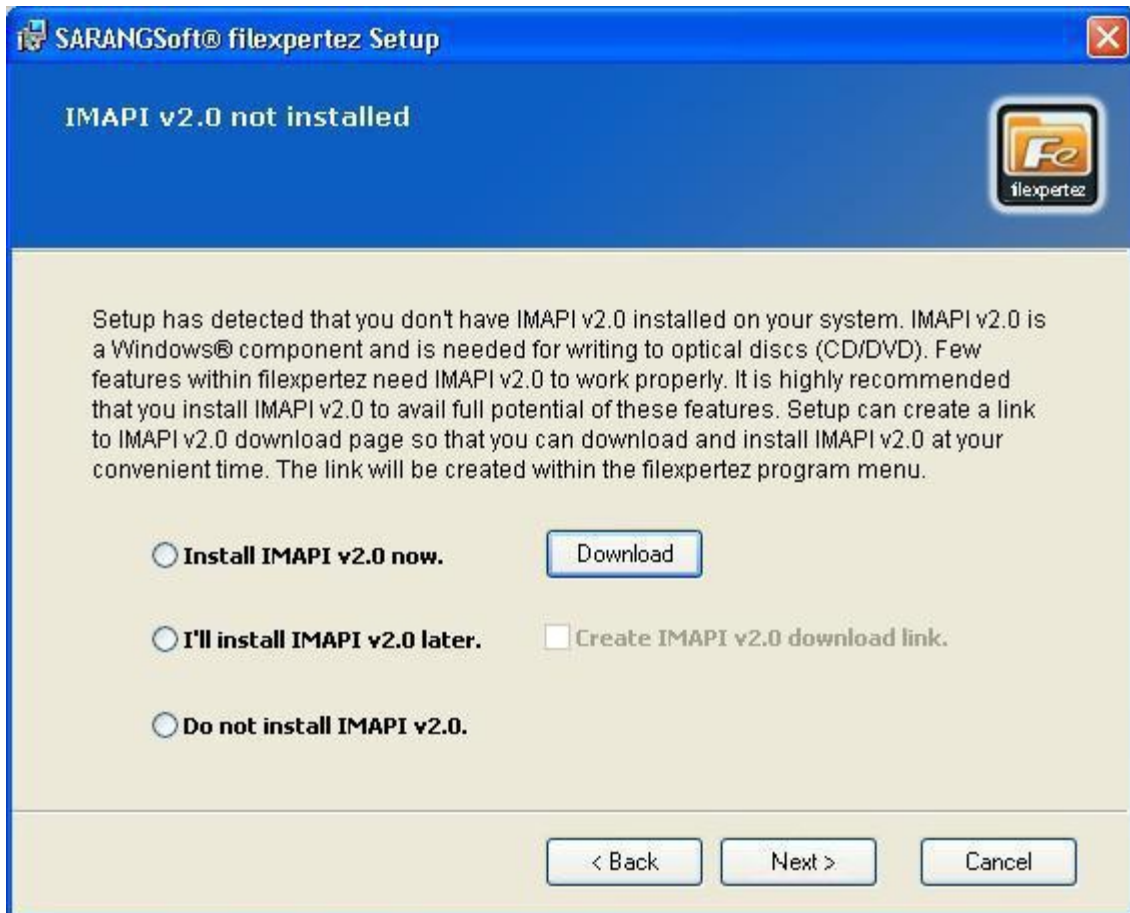

(Figure - 8)

3. The below dialog (Figure-9) displays the list of applications that are using files which are to be updated by filexpertez Setup. Close these applications and then click on 'Retry' button to continue.

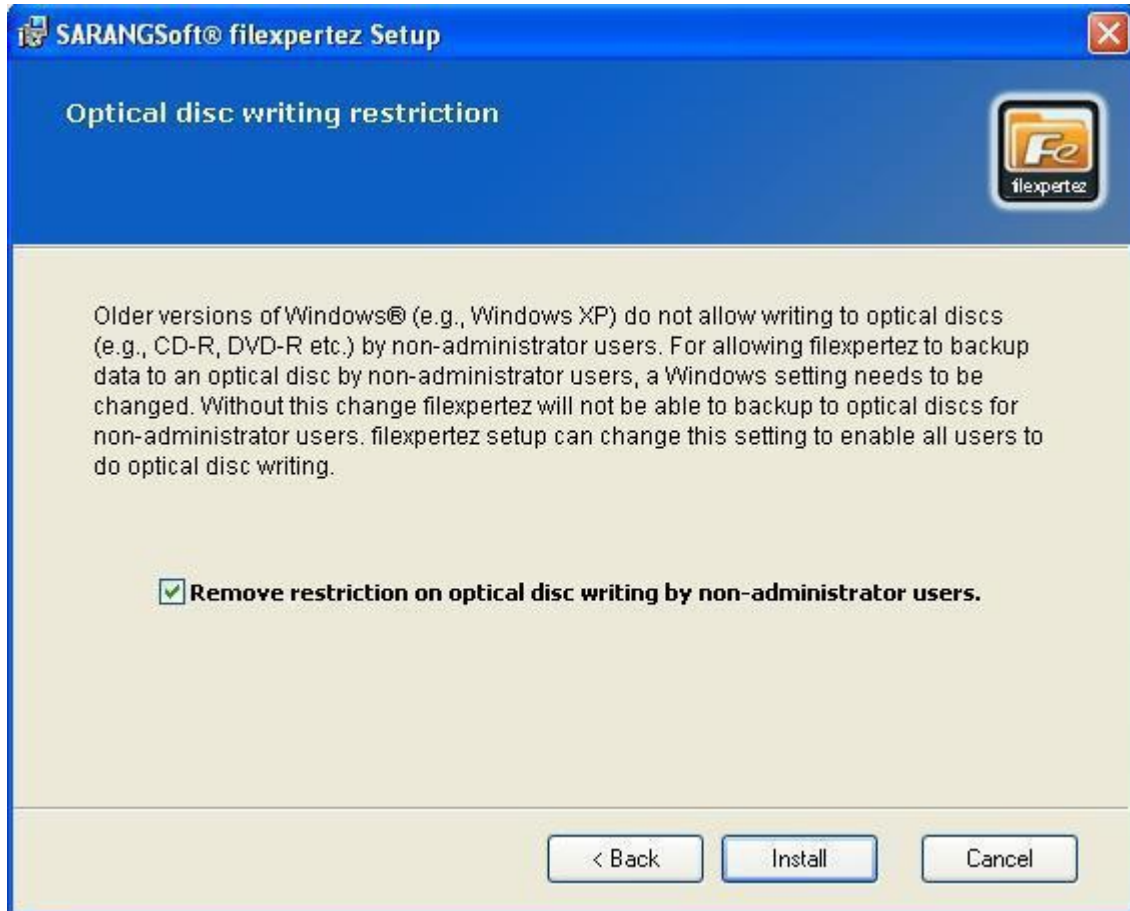

(Figure – 9)

4. The below dialog (Figure-10) appears if your computer does not have certain components, which are required by some features of filexpertez to work properly. This will allow you to create a link within the filexpertez program menu, so that these components can be downloaded and installed at your convenient time.

(Figure – 10)

5. If the user is non-administrator and wishes to take back-up in optical discs viz. CD-R,DVD-R etc. through filexpertez, a Windows setting needs to be changed. The below dialog (Figure-11) is displayed, so that non-administrator users can be permitted writing to optical discs.

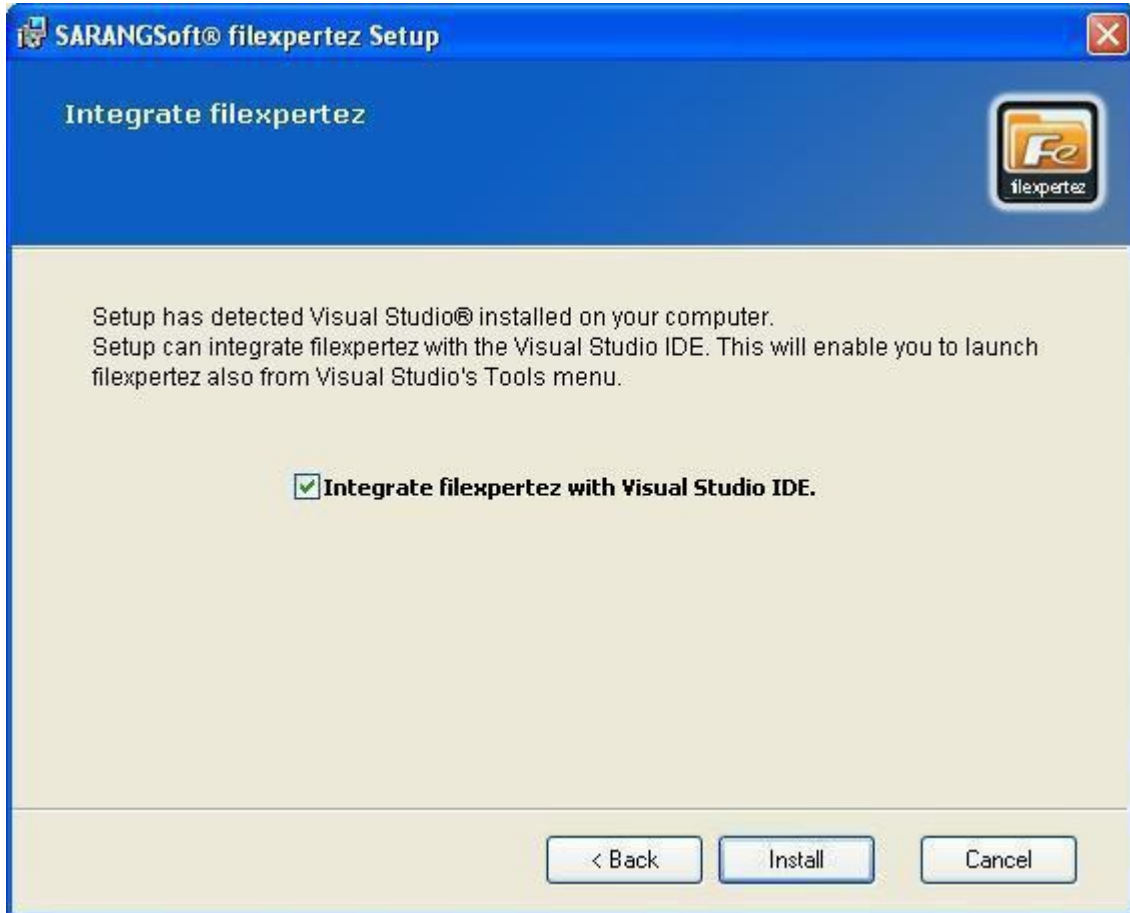

(Figure – 11)

6. Some functionality of filexpertez, such as scheduled backup, use Windows Task Scheduler. If any user has blank password for logging into Windows, by default Windows Task Scheduler will not allow the user to schedule task. However, you can opt for filexpertez to work with Windows Task Scheduler to accept blank password. The below dialog (Figure-12) displays a checkbox, clicking on which permits such users to schedule tasks such as backups.

(Figure – 12)

7. If Visual Studio is already installed in your computer, filexpertez can be integrated with Visual Studio IDE, which will enable you to launch filexpertez directly from Visual Studio's Tool menu. Please refer to Figure-13.

(Figure – 13)

Uninstall

filexpertez can be uninstalled from 'Add/Remove Program' under 'Control Panel'.
